**CONCENTRATED POINT LOAD OF WISA®-SPRUCEFLOORFR PLYWOOD**  
in accordance with Eurocode 5

The characteristic values are for a static concentrated load and mean stiffness according to EN 12871 for a structural floor and roof decking on joists.

The tested values are without safety factor calculations.

The concentrated load is located at the tongued and grooved joint which is the most vulnerable point.

Table: Static point load (50 x 50 mm<sup>2</sup>) values and impact resistance for WISA-Sprucefloor<sup>FR</sup>.
